

## EDUCATION

Massachusetts College of Art and Design - *Bachelor of Fine Arts, Sep 2014 - May 2018*

AppAcademy - Software Engineering Bootcamp May 2021 - Jan 2022

## SKILLS

JavaScript, React / Redux, HTML5 / CSS3, Express, PostgreSQL, Sequelize, Python, Node.js, Git

## PROJECTS

The Net Archives | *(React/Redux, Javascript, Express. HTML5 / CSS3 PostgreSQL, Sequelize)*

[live](#) | [github](#)

- Created user privacy through authentication handling in both the frontend and backend, only allowing users to access, edit and add their own reviews and shelves when logged in.
- Utilized Redux for state management, simplify components and manage data for form inputs and submission. Created dynamic components that were then styled with CSS3.
- Implemented custom search with Redux.
- Utilized Express with RESTful routes to manage backend endpoints, and to retrieve information from the backend database.

SeedStarter | *(React / Redux, Python, Flask, SQLAlchemy, HTML5 / CSS3)*

[live](#) | [github](#)

- Utilized Redux for state management in the frontend. Implemented dynamic form modals that were styled in CSS3.
- Utilized AWS S3 to equip the app for a much larger database use.
- Designed a Flask API with SQLAlchemy to store data.

Yarn Notes | *(React / Redux, Javascript, Express. HTML5 / CSS3, PostgreSQL, Sequelize)*

[live](#) | [github](#)

- Ensured user privacy through authentication handling in both the frontend and backend, only allowing users to access, edit and add their own reviews and shelves when logged in via JSON Web Token and PassportJS.
- Utilized Redux for state management, to simplify components, and manage data for form inputs and submission. Created dynamic components that were then styled with CSS3.
- Utilized Express with RESTful routes to manage backend endpoints, and to retrieve information from the backend database.

## EXPERIENCE
